THE PRINTING PRESS HELPS THE WORLD GET BOOKISH

Books were costly and relatively rare before the innovations of Johannes Gutenberg. In 1439 he developed a system of printing—using movable type and a wooden press—that was quickly adopted throughout Europe and beyond, leading to increased production of books and the spread of knowledge to the masses.

2nd cent. BCE In India, texts written on palm leaves are bound with twine between two boards.

1st cent. The codex appears. With folded pages bound on one side between two hard covers, codices are portable, easy to use and presage the modern book.

Movable type, where individual characters are used to create words imprinted on a page, existed as early as 1045 in China. Gutenberg was the first to make type using metal, using an alloy of lead, tin and antimony.

1455 Gutenberg completes his 42-line Bible, printing 180 copies.

1810 The steam-powered printing press leads to greater speed and efficiency.

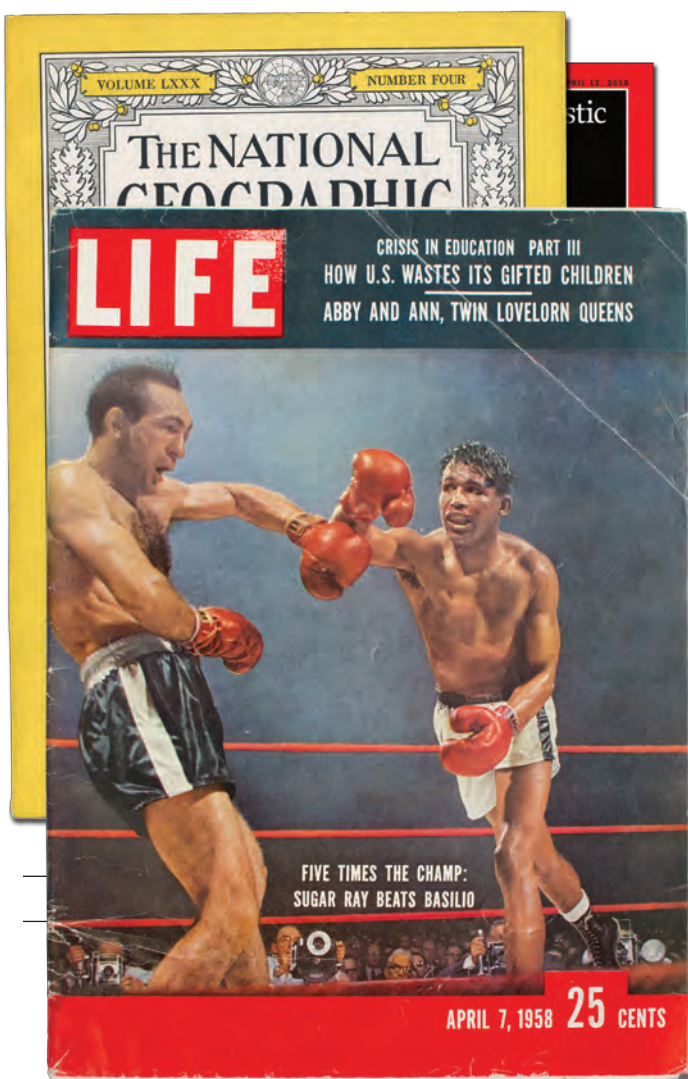

1843 Book production flourishes thanks to the steam-powered rotary press.

Mental Floss calculated that, throughout history, about 134,000,000 unique book titles have been published.

In the 19th and 20th centuries, American magazines spread trends nationwide and helped create a shared pop culture.

1731 *The Gentleman's Magazine* debuts in England. Its publisher invents the word "magazine" based on the Arabic word "makhazin," meaning "storehouse."

1741 Early American magazines include Ben Franklin's *General Magazine*.

1842 *The Illustrated London News* is the first magazine with illustrations.

1898 *Ladies' Home Journal* becomes the first US magazine to have 1 million subscribers.

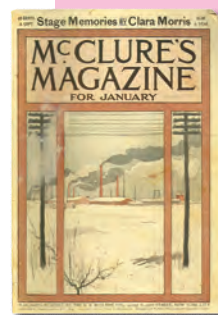

1923 *Time* ushers in the weekly news magazine.

1944 *Seventeen*, the first magazine targeted to teens, debuts.

2015 Approximately 7,300 different magazine titles are published in the United States.

FEB

READERS FLIP FOR MAGAZINES

Around 1900, popular magazines like McClure's began publishing pieces by reform-minded investigative journalists. Known as muckrakers, these writers aimed to expose corruption in business and government.

MAR

PUZZLES RISE TO THE CHALLENGE

1760s Londoner John Spilbury creates early wooden jigsaw puzzles.

c.1900 A jigsaw puzzle craze sweeps the US.

1920s Jigsaw puzzles become an inexpensive Depression-era pastime.

A 1514 engraving by Albrecht Dürer featured this "magic square," a distant ancestor to sudoku and other number-based puzzles.

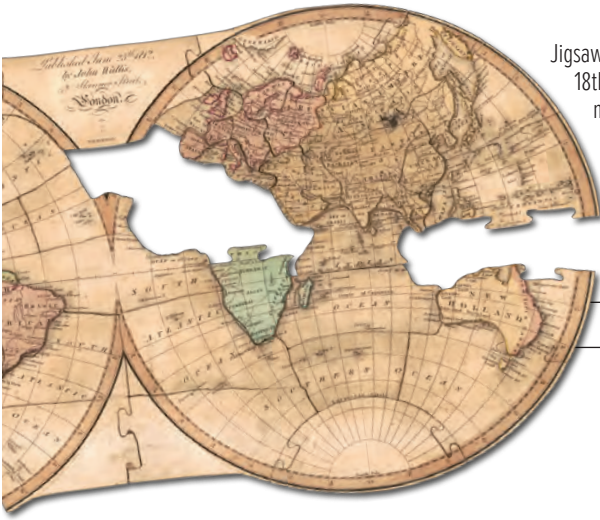

1932 Jig of the Week, a weekly 25¢ puzzle, is a hit on newsstands.

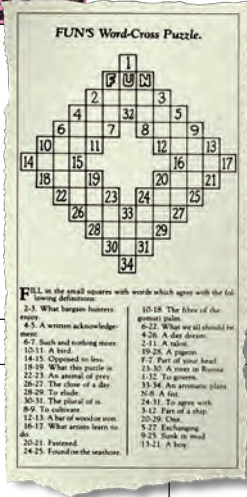

2011 The world's largest jigsaw puzzle, with 551,232 pieces, is assembled in Vietnam.

In the early 20th century, the high cost of wooden jigsaw puzzles put them out of reach of average consumers, but they became a staple of the high-society party scene.

Jigsaw puzzles emerged in the 18th century when maps were mounted on wood and cut into pieces along national borders. Known as dissected maps, they were used to teach geography to children.

The first known published crossword puzzle appeared December 21, 1913, in the *New York World*. By the 1920s they were carried in most US newspapers.

The Beatles' *Sgt. Pepper's Lonely Hearts Club Band* (1967) and Michael Jackson's *Thriller* (1982) are among the top-selling vinyl LPs of all time.

Thomas Edison's phonograph, using a rotating cylinder wrapped in tinfoil, was the first machine to play back recorded sound. The first recording was Edison himself reciting the opening lines to "Mary had a little lamb."

1877 Thomas Edison invents the phonograph.

1889 Emile Berliner's gramophone, which uses discs instead of cylinders, debuts.

1949 RCA Victor introduces the 45 rpm single a year after Columbia debuts its 33 1/3 LP.

1957 Stereo records appear.

2007 Vinyl, long considered obsolete, resurges in popularity.

APR

REVOLUTIONS IN RECORDED SOUND

Columbia Records introduced the 12-inch, 33 1/3 rpm long play record in 1948. Lighter and less brittle than its predecessors, the vinyl LP would come to dominate the recorded music market. Musicians took advantage of the LP's extended playing time to create album-length artistic statements.

CHILDREN'S BOOKS: ADVENTURES IN WONDER

Released in 1942 and still in print today, *Seventeenth Summer*, by Maurine Daly, is often cited as the first modern young adult (YA) book. This cover is from a 2010 edition.

Lewis Carroll's *Alice's Adventures in Wonderland*, published in 1865, was a watershed in children's literature. Its emphasis on fantasy and childlike imagination was a departure from earlier works for kids, which were largely educational and reality-based.

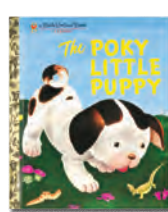

Competition with the Soviets fueled US efforts to create more engaging books for young readers. One result was the Beginner Books imprint, founded in 1957 by Phyllis Cerf, Ted Geisel (Dr. Seuss) and Helen Geisel.

1658 *Orbis Pictus*, the first children's textbook with pictures, is published.

1744 John Newbery releases *A Little Pretty Pocket-Book*, considered the first children's book.

1942 *The Poky Little Puppy* is among the first 12 Little Golden Book titles.

1963 Maurice Sendak's *Where the Wild Things Are* raises the level of artistry in children's picture books.

1950s & 1960s Early videotape formats are used in broadcasting but are too expensive for consumers.

1975 Sony's Betamax format debuts. Some early players included a 19-inch color monitor.

1976 The first VCR using VHS (Video Home System), the Victor HR-3300, debuts in Japan.

Betamax had a better picture, smaller tapes and debuted first. But VHS won the "format war" thanks to longer recording times and less costly players.

1977 RCA's VBT200 becomes the first VHS-based VCR in the US.

1987 90% of VCRs sold in the US are based on the VHS format.

2006 *A History of Violence* is the last major film released on VHS.

2016 The last known manufacturer of VCRs ceases production.

LaserDisc, introduced in 1978, was the first optical disc format for home video. It was a hit with cinephiles and paved the way for DVD and Blu-ray.

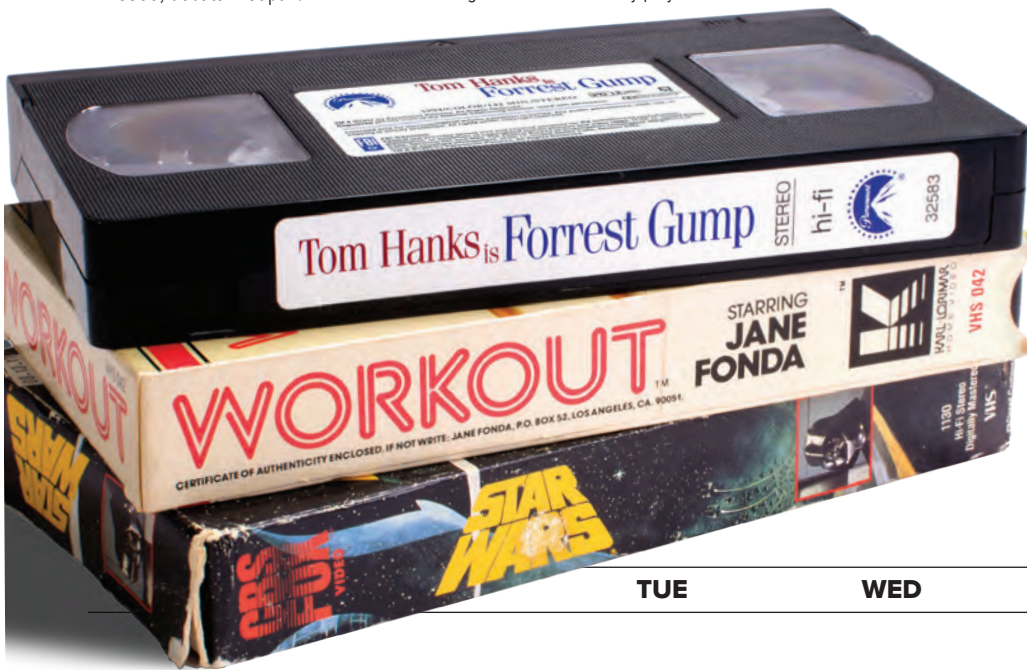

With the advent of the VCR in the 1970s, consumers could, for the first time, own copies of their favorite movies and record TV shows to watch later.

PAPERBACKS: JUDGE THEM BY THEIR COVER

Small enough to fit in a uniform pocket, paperback books were carried by soldiers in World War II. One writer noted that "if the back trouser pocket bulged in that way," it indicated that the soldier was a reader.

The modern paperback was born in 1935 with the hit debut of Penguin in the United Kingdom. Founder Allen Lane's goal was to sell affordable, high-quality books to the masses in places like train stations. Their minimalistic, type-driven cover designs, color-coded by genre, became iconic.

Inexpensive paperbound books called dime novels were published in the US starting in 1860. Their British counterparts were called penny dreadfuls.

In 1939, Pocket Books launched in the US with 10 titles priced at 25¢ each. By comparison, a hardback might cost a few dollars. Pocket sold their books in subway stations, newsstands and drugstores, reaching new readers and forever changing the bookselling industry.

17th cent. Early softcover books are printed in Europe.

1935 Penguin publishes its first paperback, *Ariel*, a biography of Percy Shelley.

1938 The first US paperback, Pearl Buck's *The Good Earth*, is released by Pocket and sold at Macy's as a test.

1950 Using the brand Gold Medal Books, Fawcett begins publishing original fiction in paperback, as opposed to reprinting titles originally released in hardback.

1960 Sales of paperbacks pass those of hardcover books.

1940 A computer playing the traditional game Nim is displayed at the World's Fair.

1958 A tennis game played using an analog computer and an oscilloscope is demonstrated at Brookhaven National Laboratory.

1962 *Spacewar*, the first computer-based video game, is invented by an MIT student.

1975 Atari partners with Sears to release its arcade game *Pong* for the home market.

1985 Nintendo's NES revives an ailing American video game industry two years after its original release in Japan, where it was called Famicom.

1995 Sony releases PlayStation in the United States. When PlayStation 2 debuts in 2000, it becomes the dominant home console.

2001 Microsoft enters the market with Xbox and hit games like *Halo*. Xbox 360 would debut four years later.

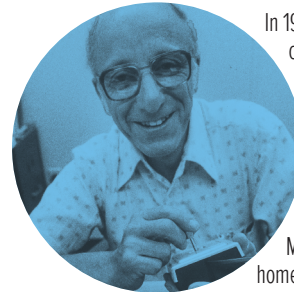

AUG

VIDEO GAMES COME INTO PLAY

Atari released the Video Computer System, known today as the 2600, in 1977. Featuring a joystick, games in color, and switches for selecting games and setting difficulty levels, it turned millions of Americans into home video game players.

In 1966, engineer Ralph Baer conceived the idea that video games could be played on a television. The next year he developed a prototype called the Brown Box, and his ideas eventually led to the 1972 release of the Magnavox Odyssey, the first home video game system.

SEPT

BAM! POW! THE HEROIC RISE OF COMIC BOOKS

The Adventures of Obadiah Oldbuck (1837) featured art in sequential panels and corresponding text below, making it a precursor to the modern comic book.

Courtesy of Dartmouth College Library

1933 *Famous Funnies: A Carnival of Comics*, the first modern American comic book, is published.

1938 The superhero archetype is born with the debut of Superman in *Action Comics* #1.

1964 The first underground comic, Frank Stack's *The Adventures of Jesus*, debuts.

1992 Art Spiegelman's *Maus* becomes the first graphic novel to win a Pulitzer Prize.

Japanese comics known as manga exploded in popularity after the Second World War.

The Comics Code Authority was formed in 1954 in response to public concern over graphic content in comics. Titles from major publishers bore the CCA seal until the early 2000s.

Mixtapes on cassette—homemade compilations of songs in a carefully considered order, often given to another person—were a mainstay in the 1980s. Novelist Nick Hornby wrote in *High Fidelity*, "making a tape is like writing a letter—there's a lot of erasing and rethinking and starting again."

1928 Magnetic tape is invented by Fritz Pfleumer.

1963 Philips introduces the compact cassette; it is first used for dictation machines.

1968 The first in-dashboard car cassette player appears.

1968 Dolby noise reduction gives cassettes better sound and more viability for music.

1993 Compact discs overtake cassettes in sales. By 2000, a tiny percentage of music is sold on cassette.

Bill Lear of Lear Jet Corporation led the development of the 8-track, which debuted in 1964 and was common until the early 80s. Some record labels released 8-track tapes as late as 1988.

Due to their small size, cassettes made music personal and portable, paving the way for products like stereo boom boxes and the Sony Walkman.

NOV

BOARD GAMES TAKE A TURN

2650 BCE The Royal Game of Ur is played in Mesopotamia.

1300 BCE Two-player strategy game Ludus latruncolorum is played throughout the Roman Empire.

1822 The first American-made board game, Travellers Tour Through the United States, debuts.

1935 Monopoly is released. It would go on to become the biggest selling board game in US history.

1995 European strategy game The Settlers of Catan is released. It has since been translated into 30 languages and called “the board game of our time.”

The ancient Egyptian game Senet, which somewhat resembles Backgammon, dates to 3100 BCE and can be seen in this painting from the tomb of Queen Nefertari.

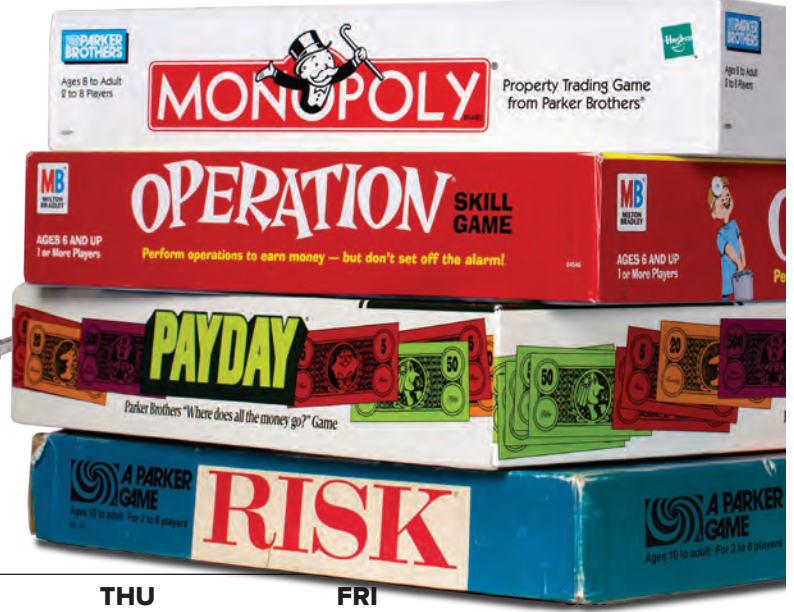

Checkers, known as draughts in the UK, has been played in one form or another for centuries, having evolved from the early Middle Eastern game Alquerque.

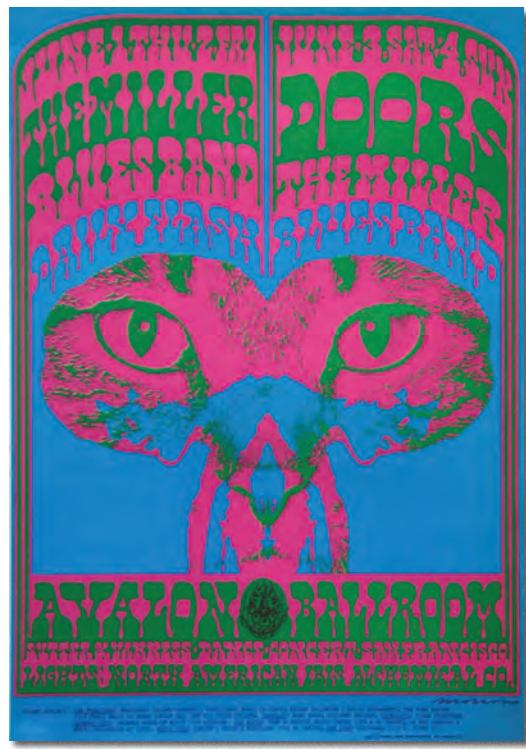

The Checkered Game of Life, released in 1860 by lithographer Milton Bradley, is known as America’s first popular parlor game and is the basis for the modern-day Game of Life.

The boot, thimble and wheelbarrow are among the Monopoly pieces to be discontinued in recent years.

Psychedelic posters of the 1960s, like this one produced by The Family Dog, were influenced by Art Nouveau and Surrealism.

“Large letter” postcards, usually printed on linen-textured paper, were popular during the mid-20th century. The style was developed by Chicago-based Curt Teich and Company.

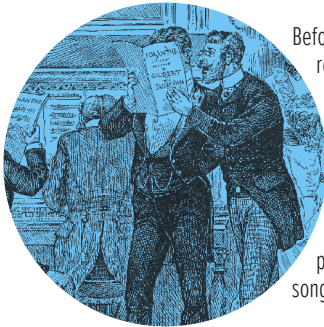

1457 The Mainz Psalter is the first printed book to include music, though the notation is added in by hand.

1840 The world’s first picture postcard is sent when British writer Theodore Hook mails a self-made card to himself.

1891 Toulouse-Lautrec’s artful poster designs spark a poster craze in Paris.

1917-1918 During World War I, the US government prints 2,500 different posters to aid in the war effort, including the famous “I Want You” recruiting poster featuring Uncle Sam.

Before the advent of recording, sheet music dominated the music industry. The late 1800s saw the zenith of “parlor music,” with people gathering around the piano to play and sing the popular songs of the day.

In the 1880s, French painter and lithographer Jules Chéret ushered in modern advertising with a new printing process that allowed for brighter colors and more economical mass production of large posters.
